

**PENNCOLOR**  
A WORLD OF COLOR

July 25, 2012

To whom it concerns:

Penn Color has been the market leader in the development and manufacturer of colorant and additive technologies to support the Vinyl Siding industry for 35+ years. It has been our uncompromised commitment to Research and Development and Quality Control that has allowed Penn Color to hold this position. Penn Color has a proven track record of supplying high-quality pigmented master-batches to the plastics industry internationally. Due to this quality and service commitment, Penn Color has the unique responsibility of being the primary supplier of pigmented color concentrates to all of the leading PVC siding manufacturers in North America, and for most of them we are their exclusive supplier and partner for their colorant and additive solutions.

The products that we offer are formulated with the highest quality pigments and additives on the market to help withstand, comply with and exceed industry standards that are established by the Vinyl Siding Institute (VSI), of which Penn Color is an active participant and contributor.

By this letter Penn Color confirms that GrandLine Company is an active customer of Penn Color's, and purchases our colorants for use in the production of some of its vinyl products such as vinyl siding profiles, soffit, and vinyl accessories under trademark GrandLine®.

Best Regards,

Mike McGarrity
